

GREEN PAGES

2022 GBCSA PRODUCT
MEMBER CATALOGUE

**GREEN
BUILDING
COUNCIL**
SOUTH AFRICA

WELCOME!

Welcome to the first edition of the 2022 GBCSA Green Pages - the catalogue profiling our product members.

At the GBCSA we certify whole buildings, and not specific products, however, we often get asked to recommend products that have an environmental focus. While we cannot interrogate the composition of each product and our rating systems rely on technical data and affiliated recognised green product labels, as a member-based organisation, we have many members who produce and distribute products that would be well placed in green buildings. This catalogue serves to profile those member organisations.

It is through the support of our members that we are able to continue the important work of transforming the South African built environment for people and planet to thrive.

The GBCSA Green Pages gives you a quick A-Z reference to all of our product members, and insight into the related Green Star rating system categories, where these products could help you to achieve points.

There are certain eco-label certifications recognised in our Green Star rating tools. In South Africa, product manufacturers who are GBCSA members get discounts with the certification bodies EcoStandard and Global Greentag, should they wish to get their products green certified.
